

Transport

No matter where we live, it is important that everyone has good transport choices available - quality walking paths, crossings, cycling routes, public transport and shared transport services. A well connected, local, reliable and accessible active transport network, with current gaps addressed, will get everyone around more cheaply, safely and easily on their own by any mode used. Switching to low and zero emission ways of moving will help make our homes, businesses, neighbourhoods and communities more resilient, sustainable and productive.

86 km of bicycle lanes and shared paths in 2023

In 2020, **12%** of all trips originating in Maroondah were by active transport*
*walking or cycling

88% of households and businesses are close to public transport facilities*
*within 400 metres

486 km of Council owned roads in 2023

52% of residents travelled to work by private vehicle in 2021 (70.3% in 2016)

Maroondah's path network, including current and future footpath construction projects, can be viewed via an online map on [Maroondah City Council's website](https://www.maroondah.vic.gov.au/maroondah-2050)

1386 public transport services (train and bus) operated daily in 2022

94% of households had access to at least one car in 2021

650 km of footpaths in Maroondah's Principal Pedestrian Network in 2023

Issues to consider

- High car dependency and ownership
- Unequal public/active transport access and quality of services
- Fragmented and incomplete active transport networks
- Transition to low and zero emission public and private transport

Possible ways forward

- Increase access to reliable, frequent public transport
- Build connected, safe and accessible active transport routes and facilities
- Explore 'smart' and 'micro' mobility options
- Expand the electric vehicle charging network and encourage take up of electric vehicles and shared transport

Principal Pedestrian Network – network of existing and planned routes that provides pedestrian facilities which support walking trips into and around key destinations i.e. activity centres, schools, transport nodes

Active transport – transport that is human powered i.e. walking, cycling, scooting

'Smart' mobility – transportation modes which are safe, efficient, flexible, integrated, and environmentally friendly

'Micro' mobility – bicycles, e-bikes, electric scooters and shared user systems relating to all of these devices

We want your hear aspirations and ideas for the future of our City.

If you live, work or play in Maroondah we want to hear from you.
